DAGEN CODING GUIDE

100 DAGEN CODING GUIDE

Jouw wegwijzer in je
eerste 100 dagen als IT'er

Sunil Kumar
@sunilc_

...

Common mistakes developers make as a beginner:

- Coding without planning
- Planning too much before coding
- Underestimating code quality
- Not writing enough comments
- Not writing unit tests
- Making assumptions without clarifying doubts
- Not questioning existing code

Schuilt er in jou een IT'er? Ontwikkel je coders skills- & mindset in 100 dagen!

De 100DagenCoding Gids:

- > een tool om de eerste 100 dagen succesvol door te komen
- > dit playbook is een inspiratie en wegwijzer om je carrière naar IT te maken.
- > met linkjes en navigatie naar tips + trucs
- > aangeboden door TekkieWorden Pathways & TechGrounds

 Danny Thompson
@DThompsonDev

When you are stuck on a problem,
these are the sites to check!

- > Google
- > Stack Overflow
- > MDN Docs
- > Docs of that language
- > Reddit
- > W3 Schools
- > Twitter

Where do you go when you are
stuck on a question?

#100DaysOfCode #CodeNewbie

> be a
**self-directed &
Peer learner**

> be a self-directed & Peer learner

A screenshot of a Twitter post from user @nickbulljs. The post features a yellow circular profile picture of a man with short brown hair. To the right of the picture, the text "Computer programming" is displayed above the name "Nick Bull" and the handle "@nickbulljs". Below the profile picture, the main text of the tweet reads: "You know that "Googling" is one of the top 5 skills for web developers? Here 7 tips to master it". At the bottom left of the post, there is a downward-pointing arrow icon.

Goed kunnen zoeken, en je weg naar de juiste uitleg, voorbeelden en instructievideo's vinden is een kernkwaliteit van elke IT'er. Hier een aantal tips om optimaal gebruik te maken van Google:

1. Use "site:" to get results from a specific website
2. Use quotation marks to look for the exact phrase
3. Use minus sign "-" to skip those results which have the words mentioned after the minus
4. Use "define:" to ask Google for a definition of a word instead of relevant articles
5. Use "related:" to look for similar websites
6. Use "filetype:" to get the results that have a specific file in the document
7. Use "intitle:" to get the results that have the keyword mentioned in the title

(Zie uitgewerkte voorbeelden via de twitter post)

50 Fundamental Advices for Junior Developers

Maxi Contieri 2 hrs ago

What I would say to myself if I could travel to my past.

Today I wrote a tweet asking for recommendations to junior developers

<https://twitter.com/mcsee1/status/1359541631171653640>

I got a lot of very interesting answers. I will group them down here.

Tweets are textual, I chose the more representative, corrected some typos and abbreviations and added some references.

50 fundamentele adviezen voor
Jr. Developers,
van Sr. Peer developers,

Nick Foscarini • 2nd
Front End Developer, 10+ years of JavaScript ★ React ★ Angular ★ NodeJS
2d • Edited • 

Are you a **#juniordeveloper** looking for your first **#reactjs** job?

Make a good impression by showing that you understand how Error Boundaries do NOT work in a **#reactjs** project!

You cannot use Error Boundaries to catch errors inside event handlers, asynchronous code, setTimeout callbacks or inside Promises but you can still make it work!

You just need to "rethrow" the error from the render function, and here are 3 easy steps to make it work.

- 1) useState() will let you pass an error to the next render pass.
- 2) use "setError" as the handler for errors with a promise.
- 3) conditionally rethrow the error from inside the error boundary.

With just 3 lines of code you've worked around a serious limitation in React's error handling, and demonstrated during an interview that you're a creative problem solver. That's exactly what senior React developers are looking for in a **#juniordeveloper!**

You've got this! Your next interview will be better! 😊

Computer programming

Danny Thompson
@DThompsonDev

...

Programming concepts are the same in all Languages
That is why I always say, learn WHY something is happening as opposed to following a tutorial blindly.
If you know the concept in Java, then you also know it in C#, Python etc
Fundamentals are transferable! 🙏

❤️

#100DaysOfCode

Danny Thompson
@DThompsonDev

...

One of the best things I ever did as a Junior developer was not understanding HOW something worked but WHY that was the approach used.
If you understand HOW, You can recreate it for the exact same situation.
If you understand WHY you can implement it in different situations!

WHY beats HOW! (Volgens Danny)

> being smart & efficient

Jessica Carter (@jesss_codes) posted a tweet on April 30, 2021, at 2:03 PM. The tweet contains a list of free hosting platforms for both Frontend and Backend projects.

Frontend

- Vercel
- Netlify

Why communication skill is as important as coding skill

I didn't know it when I started my programming career

Read this so you don't make my mistake

IT-skills & soft skills, read more >

IT skills zorgen dat je een interview krijgt.
Soft skills zorgen dat je een baan krijgt.

Mads Brodt
@madsbrodt

...

To become a great developer, technical skills aren't enough. You need to spend time learning soft skills, like:

1. Showing empathy
2. Being a good team player
3. Communicating effectively
4. Asking for feedback
5. Understanding the bigger picture

Seriously underrated skills 🤘

Tech Grounds

> IT is more than IT skills

Learn to code.

Learn to test.

Learn to refactor.

Learn to collaborate.

Learn to build projects.

Learn to sell.

Learn to freelance.

You will be an unstoppable
developer.

> IT is more than IT skills

Nick Bull
@nickbulljs

Software engineering ≠ Coding

Software engineering focuses on creating business value by addressing the correct problems

Failing to understand the needs of the business is the most common reason why software projects fail

Understanding the problem before coding it

Kyle Prinsloo
@study_web_dev

- ✗ “I am a web developer.”
- ✓ “I help dentists get more patients.”
- ✓ “I help nutritionists get more clients.”
- ✓ “I help course creators sell more courses.”

Sell the OUTCOME.

Not the tool.

Ooit vroegen we aan een coder uit Silicon Valley: “wat maakt iemand een goede software engineer”.

Zijn antwoord: “iemand die businessmodellen snapt”.

> IT is more than IT skills

@TheAnkurTyagi

Top Things Every Developer Must Learn To Grow...

- Invest & save early
- Get a mentor
- Take care of yourself
- Hit the gym 3-5 times a week
- Learn Cooking
- Learn Networking
- Take more risks
- Read books
- Believe in yourself
- People over technology

Trouwens, ook Ankur kan je volgen via twitter. 📱🎧💪 [Link >](#)

Victor

@vponamariov

I reviewed 100+ user interfaces this year.

Avoid the most common 18 mistakes to make your UI/UX design better 

30/07/2021, 9:49 AM

Design = function,...

so when you code always be aware of UI/UX.

...

Best websites to find job for developers:

- ⚡ stackoverflow .com/jobs
- ⚡ jobs .github .com
- ⚡ glassdoor .com
- ⚡ indeed .com
- ⚡ remoteok .io
- ⚡ weworkremotely .com
- ⚡ monster .com
- ⚡ linkedin .com
- ⚡ producthunt .com/jobs
- ⚡ angel .co/job

How to become a front-end developer in 2020:

1. Learn basic HTML and CSS
2. Learn basic vanilla JavaScript
3. Use those skills to build LOTS AND LOTS OF PROJECTS
4. Showcase your projects on your portfolio and begin applying for jobs

It'll take time, but you can do it! 🔥

Side projects are a great way to show your skills to land your first job as Front-end Developer.
5 Javascript Projects You Should Consider To Build as Frontend Dev.
A Thread...

Ankur @TheAnkurTyagi · 17h
1. Build a Tic-tac-toe game with Pure JavaScript
Building a game in a browser can be a great exercise to test your JavaScript skills.
You will have to react to user events, interact with DOM, and store game data.

Computer programming

Ravin 🖥️🚀
@ravinwashere

There are two types of coders in JavaScript World.

1. const myFunction = () => { // do stuff }
2. function myFunction() { // do stuff }

Which one are you?
